

GPS Data (BINEX) Streaming via Iridium Short Burst Data (SBD) Mode Preliminary Report (report, 2007)

Article Number: 389 | Rating: Unrated | Last Updated: Thu, Feb 19, 2009 at 10:00 PM

GPS Data (BINEX) Streaming via Iridium Short Burst Data (SBD) Mode Preliminary Report

3/20/2007 Rev.2

Performed under UNAVCO sub-contract by: Alberto Behar, PhD

Purpose:

This is a report for a system that is able to stream GPS position data (BINEX open format) from a Trimble NetRS (easily adaptable to other units) to a microcontroller + Iridium modem box that can then send the data through the Iridium Network to the UNAVCO operations base where it is repackaged to look like the original stream (Figure 1).
