Suggested configuration for a FreeWave DGR-115H radio modem connected to an AOA TurboRogue SNR-8000 GPS receiver

NOTE: The outdated and offensive "master-slave" terminology has been replaced with "Access point (AP) - Station (STA)" in all instances, but will still remain in the configuration software when implemented. Below are the suggested settings of the FreeWave Wireless Data Transceiver when directly attached to a TurboRogue receiver.

Base Modem:

**Operation mode:** Point to Point Master (AP)
**Baud Rate:** 19200
**Call book:** Set to call the serial number of the remote modem.

**Transmission characteristics:**
- **FreqKey** = 0-9
- **Max Packet Size** = 3
- **Min Packet Size** = 0
- **Xmit Rate** = 1
- **RF Data Rate** = 3
- **RF Xmit Power** = 9

Remote Modem:

**Operation mode:** Point to Point Slave (STA)
**Baud Rate:** 19200
**Call book:** Put serial number of base modem into call book.

**Transmission characteristics:**
- **FreqKey** = 0-9
- **Max Packet Size** = 3
- **Min Packet Size** = 0
- **Xmit Rate** = 1
- **RF Data Rate** = 3
- **RF Xmit Power** = 9

Remote Receiver:

Set BAUD 19200
