

GNSS Equipment Purchase Information

Article Number: 540 | Rating: Unrated | Last Updated: Mon, Apr 4, 2016 at 8:31 PM

Special UNAVCO Member Pricing Available on Select Equipment

As a benefit to members, UNAVCO has established special pricing with a number of manufacturers who supply equipment that is commonly used and supported within the community. These arrangements allow UNAVCO members to take advantage of discounts that may not otherwise be available. UNAVCO members may purchase equipment at anytime. Twice per year, members have special opportunities to pool orders toward our best volume discounts on Trimble and Topcon equipment. These opportunities are available in January and July and are announced via an e-mail to member representatives approximately 90 days in advance of order deadlines. Members should contact the vendors directly for quotes, questions and to place orders. Associate members may order equipment through this program, however, associate members from outside of North America may be referred to a local dealer or distributor for support and repair service. Depending on the manufacturer and your location, pricing may differ from equipment shipped to members in North America. You may contact the manufacturer's representatives for information on pricing and support for orders being shipped outside the US.

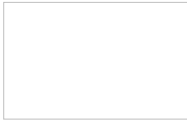

The following products are available at special member prices:
