

SuomiNet - Support Overview

Article Number: 595 | Rating: Unrated | Last Updated: Fri, Sep 3, 2010 at 5:59 PM

Note - content is provided for historical continuity and may be out of date. The UNAVCO SuomiNet pages are not actively maintained, and up-to-date SuomiNet information should be obtained from UCAR's COSMIC program at: www.cosmic.ucar.edu/suominet.html

SuomiNet is an international network of GPS receivers, configured and managed to generate near real-time estimates of precipitable water vapor in the atmosphere, total electron content in the ionosphere, and other meteorological and geodetic information.

Geodetic+Atmospheric Sites

Atmospheric Only Sites

SuomiNet Participation Procedure

NOTE: All SuomiNet systems have been allocated. There are no longer any systems available for new participants.

- [How to Proceed](#)
- [Site List](#)

SuomiNet Site Installation Instructions

- [Connect the GPS Receiver and Computer Using These Instructions](#)
- Installation questions? Contact UNAVCO (support@unavco.org).
- Notify the UCAR SuomiNet Data Analyst Teresa VanHove (vanhove@ucar.edu) when the system is connected and on-line. Include the computer IP address.

How to Access SuomiNet Data

- Geodetic data can be accessed via FTP from the [UNAVCO Data Archive](#), as daily RINEX files.
- SuomiNet participants can access their site data, and data from other SuomiNet sites by subscribing to the LDM service from UCAR. A separate computer is required to run LDM, since the SuomiNet computer is **for data collection only**.

1. Install LDM on your local computer. See the [Unidata LDM Support Page](#).
 2. Notify the UCAR SuomiNet Data Analyst Teresa VanHove (vanhove@ucar.edu) when your computer is set up to receive SuomiNet data. Include the computer IP address.
 3. Configure the "pqact.conf" file on your local machine.
- Participants may also directly access data from their own site via LDM. A separate computer is still required to run LDM, since the SuomiNet computer is **for data collection only**.
 1. Install LDM on your local computer. See the [Unidata LDM Support Page](#).
 2. Change the "ldmd.conf" file on your local SuomiNet computer to allow data access from the local computer.
 3. Configure the "pqact.conf" file on your local machine.

E-mail support questions to Unidata Support (support@unidata.ucar.edu).
