Targets Used With Riegl Scanners

796 Greg Koltz February 4, 2014 RIEGL 571

UNAVCO utilizes four different kinds of targets with our Riegl scanners. The type of target selected depends on the project specifics, including size and topography of survey area, survey goals, and logistical considerations. Below are links to information on each target.

- UNAVCO TLS Target
- Cylindrical Target (Red)
- Cylindrical Target (White)
- Flat Circular Retroreflective Target
