Trimble GPLoad v2.75

163 Beth Bartel December 11, 2009 Software 1404

The attached executable contains Trimble's GPLoad v2.75. GPLoad v2.75 can be used to download files from a 4000 series Trimble receiver and includes functionality to transfer v7.5 Trimble Survey Controller files to your local PC. This enables users who have the Trimble Survey Office software to use data collected with the Trimble Survey Controller v7.5 software. Note: The Trimble Geomatics Office software does not use GPLoad.

The Trimble GPLoad software is freely available. Check the Trimble Support page for the most recent version.
