Trimble NetRS - How to set up and take care of the UNAVCO NetRS campaign case in the field (case insert)

To see a larger version of either of the images below, right-click the image and select "View Image." To view or download a .pdf version click [here](#).

Please give the appropriate care and respect to this equipment from

UNAVCO

Remember another project will be using it after you!

Take a minute to read the following . . .

- DO NOT**- Allow equipment to be treated rough or carelessly
- DO NOT**- Make any electrical connection you are unsure of - ASK FIRST
- DO NOT**- Leave the case open or unprotected during rain or rough weather
- DO NOT**- Place any parts or components in your pockets, back pack etc. (you may lose them..)
- DO NOT**- Allow the receiver or other equip to be excessively exposed to the sun
- DO NOT**- Misplace the threaded plug for the pass through used during shipment
- DO NOT**- Disconnect, or cut wires to make modifications to the system
- DO NOT**- Crimp or kink the antenna cable
- DO NOT**- Over tighten the pass-through or the travel plug **just snug plus about 1/4 turn**

DO NOT ship or transport with the battery connected!!!

Disconnect and protect the battery terminals from being shorted!

DO- Be **very careful** to avoid damage to wiring or antenna cable when closing the case!

DO- Screw the pass through connectors into the portals *before* connecting them to internal or external leads.

DO- Remove the solar and antenna pass through-connectors after use, and return the plug to the portal holes for transport.

DO- Disconnect the GPS Receiver and all other equipment prior to transport.

DO- Carefully COIL the antenna cable and other wires, to avoid them being pinched, kinked or damaged.

DO- Pack everything in the case carefully, neatly and securely to avoid damage while the system is in transit

DO- Be sure ALL parts and equipment remain with the system case as you received it, so it will be there when you return it.

DO- Be **certain** you connect the battery properly, **and tightly:**
RED to *Positive(+)* and **BLACK** to *Negative(-)*

DO- Connect like colors:

- Red to Red ... Positive electrical
- Black to Black ... Negative electrical
- Blue to Blue ... Solar panel
- White to White ... Extra or an external Battery (if used)

Please send us any notes or comments on this system by including them on a separate sheet and placing inside the case upon return.

See assembly guide on reverse.

THANK YOU!

Complete System Setup

1.

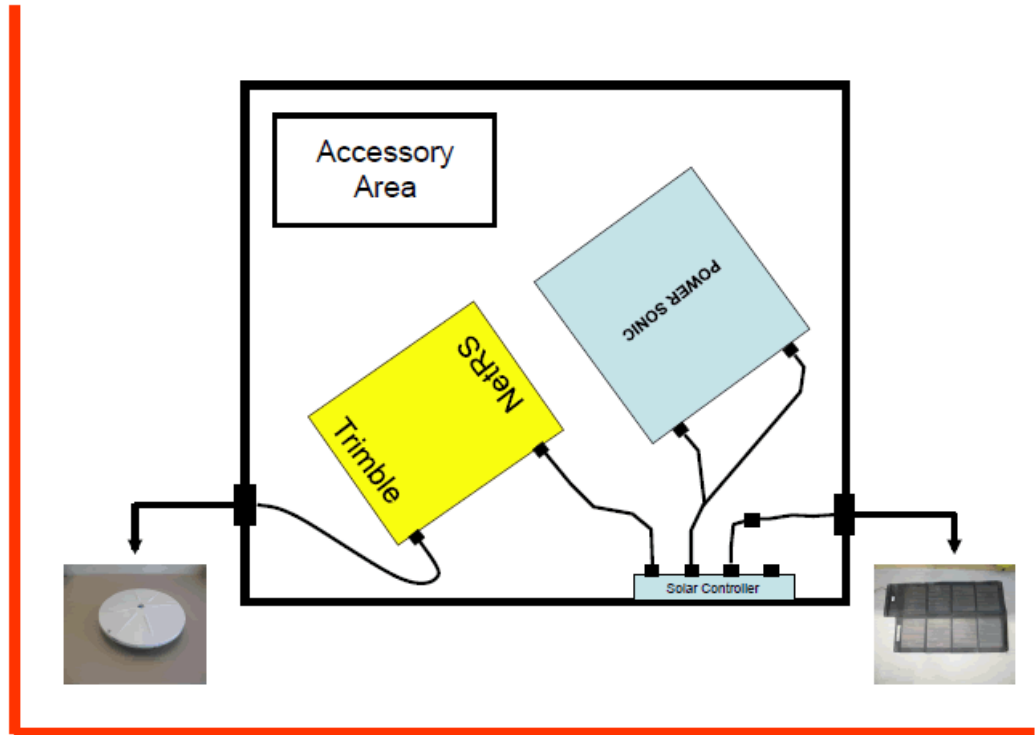

First Connect Battery. Ensure + Red, - Black!!!

2.

Then Connect the Solar Panel With The Pass-Through

3.

Next Connect the Antenna Cable With the Pass-Through

4.

Finally Connect the Power Cable to the Receiver

Solar (top) and Antenna (bottom) Pass-Throughs
