Trimble NetRS - V1.2-0 Firmware and Release Notes

January 18, 2008.

Please read the following before installing this firmware:

NetRS Firmware version 1.2-0 is capable of simultaneously logging P2 and C2 to a modified RT17 payload format (now called RT27). We currently cannot translate this, though we are negotiating with Trimble to release the RT27 format definition so that it can be included in TEQC. We are anticipating this will happen soon, and we plan a modified TEQC to be available several months after that.
