Telebit Worldblazer - Suggested Register Settings Using a Direct Connection

Trimble 4000 SSE/SSi

Below are the suggested settings of the Telebit Worldblazer when directly attached to a Trimble 4000 SSE/SSi receiver and using the Trimble "rfile -f" program. The modem is set at 9600 baud and v.32 transfer protocol.

AOA TurboRogue

Below are the settings of the Telebit Worldblazer used in the Kodiak, AK. This modem was attached to an AOA TurboRogue receiver. Data was downloaded to Boulder daily during the length of the project.
