| TO SECOND                | campaign GPS/GNSS<br>antenna mount | med-<br>high  | \$15-50 | <1 hr           | 1     | BR, R     |  |

Danish geodetic marker near Kangerlussuaq, Greenland (left); simple stainless steel pin at site DOIW in Afar, Ethiopia (right).

#### Pros

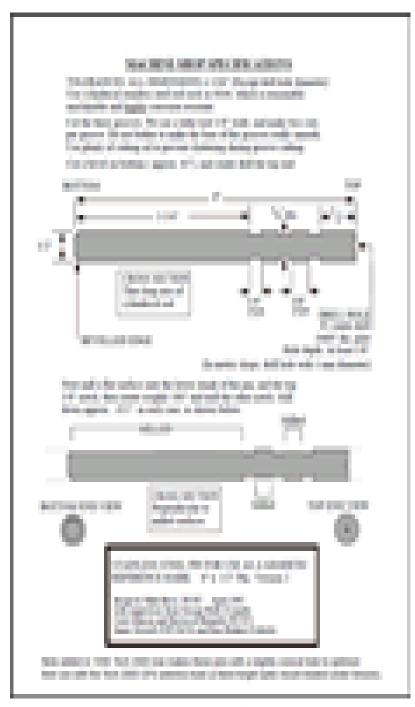

- Inexpensive (e.g. \$15-50, depending on marker design)
- Can be installed with a battery-powered drill
- Small footprint, low profile
- Short installation time (<1 hr, can be as little as 15 minutes)
- Materials and machining are available in most cities
- Can be installed on a rooftop or other stone or cement structure
- Can be occupied with a wide variety of antenna mounts

#### Cons

- Can only be installed in solid material
- Must be occupied with a temporary antenna mount

### **Design and Construction**

There are a variety of marker designs. In general, markers consist of a post with a 1 mm dimple or intersecting crosshairs on top. The marker most commonly used by UNAVCO is the dimpled monument pin, or "Bevis pin." The Bevis pin is a 6-inch long, 1/2-inch diameter stainless steel pin machined with notches on the sides to prohibit rotation and a 1 mm dimple on the top. Machine and installation instructions are given below.

**Bevis pin machining instructions (.pdf)** 

**Bevis pin installation instructions (.pdf)** 

# **Approximate Cost**

\$15-50; varies depending on marker design.

### Materials

- pin
- epoxy or quick-setting, expansive concrete and water

# Tools

- battery-powered drill
- tube to blow rock flour out of the hole
- level (optional but preferable)
- needle-nosed pliers for rescuing pins from over-drilled holes (recommended)

# Mount Commonly Used

Many mounts can be used with a monument pin, including the Tech 2000 mast, UNAVCO fixed-height spike mount, standard, short, or fixed-height tripod, or bipod. See the <u>UNAVCO Resources: GNSS Antenna Mounts</u> page.
