## 2014 Structural Geology and Tectonics Forum TLS Short Course

807 Chris Crosby June 25, 2014 Short Courses 1837

Structural Geology and Tectonics Forum Introduction to terrestrial laser scanning (ground-based LiDAR) for Earth science research

Introduction to terrestruit user scanning (ground-based LiDAR) for Earth science research
Location & Date  (NAVC) Fallity, Badder, CD, Inter 23, 2014
Workshop description: This one-day course will provide faculty, students and professionals with an introduction to Terrestrial Laser Scanning (TLS - a.k.a., ground-based lidar). TLS provides high-resolution three-dimensional images of geologic features, and has emerged as a powerful tool for applications ranging from outcrop mapping to analysis of earth surface processes. The course will focus on TLS technology, data collection, processing and analysis, and examples of science applications. A combination of lectures and hands-on demonstrations of TLS equipment and data processing will be used.
<u>Agenda</u>
Slides and other materials Introduction to TLS and applications
TLS data products and analysis (Crosby)
UNAVCO TLS support resources, community lidar resources, future directions (Crosby)
M. Anguana and angual Charley
