

Georeferencing in PolyWorks

822 Marianne Okal September 4, 2015 [Technical How-To](#) 2359

The document available for download at the bottom of this page in the Attachments section describes how to georeference TLS data in PolyWorks, using IMInspect. The contents of the document are:

- Step 1 - Selecting a Target from the Point Cloud
- Step 2 - Setting the Hugh Translation
- Step 3 - Loading a Coordinate File
- Step 4 - Matching Coordinates to Selected Targets
