ArcGIS - Beginners' Resources

ArcGIS Help Library

The ArcGIS website has an extensive amount of training resources available.
Below are listed a few pages that provide a beginner and intermediate level how-to's for lidar data processing and viewing.

- Using lidar in ArcGIS
- Creating raster DEMs and DSMs from large lidar point clouds
- An overview of analysis and LAS datasets
- Statistical analysis for LAS datasets

User Forum

A user forum is available for public information.

Videos

The following videos provide tutorials for using ArcGIS.

- For those inexperienced in ArcGIS, a good place to start is with Getting Started with ArcGIS.
- Overview of Lidar Support in ArcGIS 10.1
- Lidar - Working with LAS datasets - over an hour of useful how-to's.
