Septentrio PolaRx5 - Where to Find the Correct Serial Number For UNAVCO Dataflow and Archiving

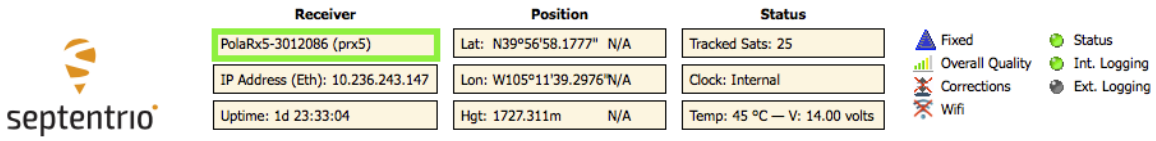

846 Henry Berglund March 7, 2017 PolaRx5, Septentrio 3311

Please use the numeric portion of WIFI SSID (Highlighted in GREEN) when recording the serial number for installation reports.

The serial number highlighted in RED is needed for RMA's that require international shipping. **Do not use the serial number highlighted in RED for installation reports.**

You may also find the correct serial number for installation reports displayed in the receiver's web interface:

And in the output from a Teqc metadata report:

```
$ teqc +meta prx50860.16_
 filename: prx50860.16_
 file format: Septentrio SBF
 file size (bytes): 9131756
 start date & time: 2016-03-26 00:00:00.000
 final date & time: 2016-03-26 23:59:45.000
 sample interval: 15.0000
 possible missing epochs: 0
 4-char station code: prx5
 station name: prx5
 station ID number: prx5
 antenna ID number: -Unknown-
 antenna type: TRM59800.00 SCIT
 antenna latitude (deg): 39.949502
 antenna longitude (deg): -105.194260
 antenna elevation (m): 1729.910
 antenna height (m): 0.0083
  receiver ID number: 3012086
 receiver type: SSRC7
 receiver firmware: 5.0.1
```
