Septentrio PolaRx5 - Where to Find the Correct Serial Number For UNAVCO Dataflow and Archiving

846 Henry Berglund March 7, 2017 PolaRx5, Septentrio 2225

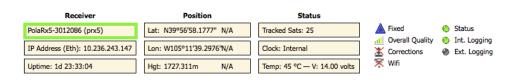

Please use the numeric portion of WIFI SSID (Highlighted in GREEN) when recording the serial number for installation reports.

The serial number highlighted in RED is needed for RMA's that require international shipping. **Do not use the serial number highlighted in RED for installation reports.**

You may also find the correct serial number for installation reports displayed in the receiver's web interface:

And in the output from a Tegc metadata report:

\$ teqc +meta prx50860.16_ filename: prx50860.16_ file format: Septentrio SBF file size (bytes): 9131756

start date & time: 2016-03-26 00:00:00.000 final date & time: 2016-03-26 23:59:45.000

sample interval: 15.0000 possible missing epochs: 0 4-char station code: prx5

station ID number: pr

station ID number: prx5

antenna ID number: -Unknownantenna type: TRM59800.00 SCIT antenna latitude (deg): 39.949502 antenna longitude (deg): -105.194260 antenna elevation (m): 1729.910
